

## Company Profile

**Tree Solutions Inc.** is a firm providing arboriculture consulting services, including the following:

### **Tree Risk Evaluation & Health Management**

We use state-of-the-art evaluation tools, including the Resistograph Drill, to assess trees and identify those that are of concern for potential risk. We provide detailed custom management plans for each evaluated tree, with instructions for pruning or removal to reduce risk, diagnosis and treatment recommendations to improve health, and general tree care instructions. Our certified arborists use ISA-approved Hazard Tree Evaluation forms. We also work closely with plant pathologists and treatment labs, enabling us to make broad-based and accurate assessments of tree health and condition, as well as effective treatment plans.

### **Tree Retention Planning For Project Sites**

We provide tree protection services for construction and remodeling projects. Written tree protection specifications, with supervision of construction near protection zones, root pruning as needed, and follow-up inspections, are standard.

### **Municipal & Campus Tree Management**

Our services include tree-related policy development and implementation, staff training, tree inventories, and hazard tree risk management programs.

### **Sustainable Landscape Design and Natural Area Restoration**

We design and implement plans for retaining or restoring natural areas and related native understory plants in landscapes.

### **Tree Valuation & Appraisal.**

We provide accurate valuations and appraisals of trees and plants for insurance claims or legal cases.

### **Expert Witness Services**

Our principal, Scott D. Baker, has had expert witness training through the American Society of Consulting Arborists, as well as experience testifying in court.

### **Arboriculture Training & Education**

Tree Diagnostics, Construction with Trees in Mind, Tree Biology and Anatomy, Tree Climbing Workshops, IML-USA Resistograph Drill systems

### **Treatments for Trees**

Associate Sean Dugan is a Washington State Licensed Pesticide Applicator. He applies soil treatments, Cambistat® growth regulator, and Merit systemic insecticide.

### **Special Situations:** Treehouse trees, Eagle Nest and Roost Trees, Vegetation Management for Slopes and Bluffs, Challenge ("Ropes") Course trees

*Our clients include: homeowners, commercial arborists, attorneys, contractors, developers, insurance companies, municipal governments, planners, architects, and landscape architects.*

## THE TEAM

Principal **Scott D. Baker** is a Registered Consulting Arborist, Certified Arborist, and Certified Tree Risk Assessor with over 30 years experience in arboriculture. A successful developer of urban historic building renovations and a residential community, Scott utilizes knowledge of site management issues, building codes, site design, and construction. He is interested in furthering the use of science and technology in arboriculture, and he is in demand as a speaker and educator in tree diagnostics, tree preservation, and urban forest issues.

Senior Associate **Sean Dugan** is a Registered Consulting Arborist, Certified Arborist, and Certified Tree Risk Assessor with a Masters in Forest Resources, and a B.S. in Environmental and Forest Biology. He has over 9 years experience in hazard tree assessment, site inspection, and evaluation. His graduate work focused on municipal tree ordinance evaluation.

Associate **Holly Iosso** is a Certified Arborist with a BS degree in Landscape Architecture and an AS degree in Landscape Horticulture. She has 7 years experience in residential design, maintenance and site analysis.
